INTERPRETATIONS

Sub-Contractors, Fishermen's Oil Spill Emergency Team (FOSET), Support/Advisory Consultants and Mutual Aid

The Canadian oil spill response regime was established in 1995 to ensure a state of readiness would always be in place and that the response capability be practical, effective, sustainable and affordable. The concept was not to produce a fire hall type response with personnel and equipment in all locations waiting for a potential call, but rather, it was decided to develop guidelines and standards that were reasonable and practical, and to staff the organization with a minimum level of personnel, calling in support personnel as required.

Western Canada Marine Response Corporation (WCMRC) has identified and developed contractual arrangements with many contractors and advisors based on their expertise, knowledge and experience. Their fees are on an individual and/or company basis, based on marketplace rates, the aforementioned expertise, and the knowledge and experience they have in spill response. WCMRC has established these support contracts in advance of a response to ensure consistency in rates, and as well to ensure support personnel have been integrated into our spill management practices through exercises, training, and hands-on maintenance of equipment. Invoices from sub-contractors passed through WCMRC will be subject to a handling fee. Sub-contractor rates are non-negotiable.

The Fishermen's Oil Spill Emergency Team (FOSET) was established to supplement on-water support with vessels of opportunity and response personnel. FOSET members have extensive knowledge of the coastal waters of British Columbia, and WCMRC has established a contractual arrangement with these fishers, depending upon their availability, to assist in marine oil spill response. Charter rates have been pre-established for the various types of vessels, and some of the other typical charges associated with a vessel chartered for oil spill response activities will include:

- provisions (excluding personal items, alcohol, tobacco, etc.)
- fuel
- accommodation (some vessels have extra berths that may be used by WCMRC or its' sub-contractor personnel when in remote locations)
- WorkSafeBC premiums
- insurance premiums for these vessels, as applicable

These charges will be included in WCMRC's invoice to the responsible party, are non-negotiable, and will be subject to a 15% handling fee.

Western Canada Marine Response Corporation

Schedule of Personnel/Equipment Rental Rates

Mutual Aid

WCMRC has established a network with other spill response organizations (i.e., Washington State, Alaska) to ensure that specialized equipment and personnel can be obtained if/as needed. Invoices from mutual aid partners will be subject to a handling fee, and their rates are non-negotiable.

WCMRC will issue interim invoices throughout the response, and will continue until all associated costs have been billed. In the event of disputed items, please refer to the disputed invoices clause of the agreement. As referred to in the agreement, 80% of any disputed item is payable within the terms of the invoice (due and payable by the end of the fifth business day following receipt).

During spill response operations, meals are provided on-site, where appropriate, to all field and incident command personnel at a reasonable cost, which will be billed to the responsible party, and are subject to a handling fee.

Discounts

Members (refer to Definitions) are entitled to a discounted rate on certain equipment.

Non-members are not eligible to any discounted rate.

Note:

WCMRC will honour the contractual agreements in place with sub-contractors, FOSET members, support/advisory consultants and mutual aid organizations, and therefore will not re-negotiate their rates.

Western Canada Marine Response Corporation

Schedule of Personnel/Equipment Rental Rates

DEFINITIONS

Billable hours - where equipment is deployed, and is either operating or dedicated to remain on-site, and as such, is not available to WCMRC for use in other responses, will be billed on a 24 hour period at the full rate.

Daily Rate - the rate for certain WCMRC equipment is based on a daily rental. Deployment of the equipment for any amount of time will be charged at this daily rental rate.

Equipment Status -

Equipment is operating if it is:

- i) Deployed
- ii) In transit
- iii) In decon
- iv) Standby/staged and dedicated to a response

Equipment is not operating if it is:

- i) Standby/staged and available for use in another response
- ii) Under repair

Handling fee - is calculated on all equipment, services and disbursements (excluding materials supplied through WCMRC) will be billed, subject to a 15% handling fee – refer to the following scale:

Handling fee service charge: –

- Invoices \$0 to \$500,000 = 15%
- Invoices \$500,001 and over = 1%

Major Equipment - for purposes of decontamination, the following will receive the highest priority

- All vessels, workboats and skimming vessels
- Portable skimmers
- Containment boom

Member - an organization with an arrangement, *Ship (Bulk Oil)*, *Ship (Non Bulk Oil)*, or *Oil Handling Facility Membership Agreement* with WCMRC, a certified Response Organization, as required under the *Canada Shipping Act, 2001*, (CSA, 2001) or an organization with a subscription agreement with WCMRC. Members also include Subscriber members.

Non-member - an organization that does not have an arrangement in place prior to requesting spill response services.

Western Canada Marine Response Corporation

Schedule of Personnel/Equipment Rental Rates

Not available for use in another response – equipment is not available for use in another response if it is requested to remain on scene by the responsible party or it is dedicated to the next day's response operation by way of a work order or assignment.

Response Organization - certified by Transport Canada to respond to marine oil spills of up to 10,000 tonnes.

Standby/staged rate - where equipment has been deployed, but not operating, yet can be used in another response, if required, - 50% of the normal rate.

Subscriber member - an organization, which has an agreement (Subscriber Agreement) with WCMRC. There is no requirement under the CSA, 2001 for these members to have an arrangement with an RO, however, as part of their due diligence, have elected to be a member of WCMRC. Subscriber members are entitled to member discounts.

WCMRC - Western Canada Marine Response Corporation - Response organization on Canada's west coast.

Western Canada Marine Response Corporation

Schedule of Personnel/Equipment Rental Rates

GENERAL

Daily Rate

- Equipment is either billed at a daily rate (for example- barges) or on an hourly basis.
- The maximum rental for a specific section of deployed boom is 25 days for members. This cap on boom rental does not apply to the Kepner boom (Harbour, Offshore, Hi-Seas), Shore Seal, Ro-Boom System, the NOFI Current Buster, or NOFI Vee-Sweep. Non-member boom rental periods are not capped.
- When major equipment is in decontamination, then a 24 hour per day charge will apply until such time as the equipment is returned to its normal inventory location.
- Equipment is in service from the time it leaves its normal inventory location to the time it is returned to its normal inventory location (portal to portal), including the time during decontamination.
- No daily rate charges will apply if equipment is out of commission for repairs.
- The time involved in decontamination, transit, and in staging will be considered as operational.

Equipment Categories

In order to determine the rental rates, the equipment is divided into the following categories:

Non-durable Equipment - includes equipment that is expected to deteriorate quickly as a result of use in any spill situation due to its construction. This includes fabric based equipment (e.g. boom), light-weight mechanical equipment, and certain equipment that does not easily resist heavy abuse.

Durable Equipment - includes equipment that is robust and designed for marine environments. Most large dedicated oil spill equipment is in this category (e.g., trailers, skimmers, boats). Also included is equipment less robust, but which would not be subject to heavy service (e.g., communications equipment), if used in the Operations Centre or Incident Command Post).

Barges - includes steel and aluminum or similar barges, primarily used as a work platform or as storage, with little or no equipment as an integral part of the barge. Equipment loaded on the barge will normally be charged separately.

Vehicles - includes any motorized vehicle owned by WCMRC.

Consumables

Sorbents, personal protective equipment and other materials owned by WCMRC will be charged in accordance with the published schedule.

Additional Charges

- Hand tools (i.e., shovels, rakes, etc.) will be charged at replacement cost plus the handling fee, as applicable, if not returned to WCMRC inventory, and cannot be decontaminated;
- Additional insurance costs applicable to skimmers (self-propelled) at a rate of up to \$230.00 per day

Western Canada Marine Response Corporation

Schedule of Personnel/Equipment Rental Rates

per skimmer during response is charged, as applicable. This may also apply to other vessels.

- FOSET (Fishermen's Oil Spill Emergency Team) fleet - additional insurance and workers' compensation premiums will apply, as appropriate;
- All transportation costs for equipment transfer, including barges and vehicles, to and from a WCMRC facility or other WCMRC equipment location (i.e., custodian facility) to the site are additional;
- Operating expenses (i.e., fuel) and personnel costs are not included in the *rental rates*;
- WCMRC is not responsible for the disposal of waste materials, but will assist with the disposal plan, at the cost of the responsible party or requesting agency.
- Charges for equipment will continue until all equipment has been decontaminated, and returned to its usual inventory location. Associated personnel charges will apply, as applicable.
- Where equipment has been contaminated by persistent oils, it may not be feasible to decontaminate (i.e., storage tanks, hoses). This equipment, or part of equipment will be replaced, and the replacement cost plus the handling fee will apply. Some types of storage tanks have liners, and in these cases, the replacement cost of the liner, plus handling fee will apply.

Minimum Charge

The minimum call out charge for personnel and equipment is 4 hours.

Decontamination

When major equipment, as defined below, is in decontamination ("decon"), then a 24-hour per day charge will apply until such time as the equipment is returned to its normal inventory location. A maximum of a 12-hour daily rate will apply to all other equipment during decontamination. Where there is a delay in completing the decon process, and this delay is due to WCMRC, then no rental will apply for that period only.

Major equipment

- All barges, vessels and skimming vessels, and workboats
- Portable skimmers
- Containment boom

Damaged Equipment

Where equipment has been damaged and is repairable, then the cost of the repair and handling fee will apply.

Equipment Damaged Beyond Repair

The charges for equipment damaged beyond repair, and/or lost, as a result of the response, will be billed at replacement cost plus a 15% handling fee. This limit is exclusive of the daily operational or standby rates already charged for the time used before the damage, but does not include applicable disposal costs, which are additional where required.

Western Canada Marine Response Corporation

Schedule of Personnel/Equipment Rental Rates

Transportation of Equipment

The transportation of equipment, either by WCMRC personnel or a third party, will be considered operational time and will be billed. All third party charges are subject to a 15% handling fee.

Extraordinary Transportation of Equipment (i.e. air charter)

WCMRC will advise of the costs and request specific approval. A handling fee will apply.

- All rates/prices are subject to change without notice
- All fees/charges are subject to applicable taxes

Note: Special rates for the extended use of equipment/services may apply at the discretion of the WCMRC president/general manager.

Western Canada Marine Response Corporation

Schedule of Personnel/Equipment Rental Rates

PERSONNEL

Personnel/Equipment

Rates for personnel, equipment and consumable items are established according to the structure outlined as follows. **Rates are subject to change without notice.**

WCMRC personnel rates are quoted on the basis of an eight-hour shift per person, and do not include expenses (i.e., meals, accommodation, etc.). Where the hours worked are in excess of the eight-hour day, or 40-hours per weekly shift, these additional hours will be billed based on the following hourly rates. Expenses will be billed, subject to a handling fee, and will be supported with appropriate documentation. Travel time is billable based upon hourly rates.

Table 1: Service rates - Personnel

Position	Hourly	
	1 to 8 hrs/day and 40 hrs/week	> 8 hrs/day and 40 hrs/week and holidays
Spill Response Manager Deputy Spill Response Manager	\$200	\$300
Section Chief Command officers (Liaison, Safety, Information)	\$115	\$180
Deputy Section Chief Branch directors (Air Operations, Support, Services)	\$95	\$160
Managers Group supervisors Unit, field and task leaders Coordinators Mapping specialist Barge Master Field observers Field safety	\$90	\$150
Oil spill technician Vessel captain/operator	\$75	\$120
Field operations personnel (deckhands, shoreline workers) Unit and group personnel Administrative support	\$60	\$90
Sub-contractor	Invoices as submitted by the sub-contractor, including their expenses and equipment, plus a handling fee.	

All personnel, including accounting, administrative, logistics, and management, whether on site or at support locations, are billed at the above rates, regardless of full-time or part-time status. Rates for remote sites and prevailing-wage projects may require a surcharge to be determined.

Western Canada Marine Response Corporation

Schedule of Personnel/Equipment Rental Rates

For any ICS position filled by a contractor, the rate will be the contractor's invoice, plus the handling fee. Where a contractor has been required to take personnel off existing jobs to respond to emergency response activities, their rates may reflect emergency rates in consideration of penalties, etc. they incur as a result of delays to existing jobs.

Training/Consulting Services

WCMRC personnel are available to conduct spill response training and consulting services, at an hourly rate, as follows:

Table 2: Service rates -Training and consulting

Position	Hourly	
	1 to 8 hrs/day	> 8-hour day
President Deputy Spill Response Manager	\$150	\$240
Operations support Technical support	\$100	\$160
Business support Financial analysis	\$100	\$160
Training	\$100	\$160
Administration	\$50	\$70

Expenses (i.e., flights, accommodations, meals, etc.) will be billed, subject to a handling fee, and will be supported with appropriate documentation. Travel time is billable based upon the above hourly rates.

Other

WCMRC's training room is available for rental, inclusive of audio visual equipment, as follows:

- \$150.00 per day
- \$175.00 per day (includes coffee)

Trajectory modeling, outside of spill response (i.e., exercises), is available at \$250.00.

WCMRC equipment used for the purpose of exercise and training will be billed at the published charge-out rate.

Western Canada Marine Response Corporation

Schedule of Personnel/Equipment Rental Rates

EQUIPMENT

Table 3: Rental rates - Response Organization equipment

Description	Rate
Non-durable	3.5% of replacement cost
Semi-durable	1.1% of replacement cost
Durable	0.56% of replacement cost
Barges (equipment extra)	see schedule
Vehicles	
Consumables	
Disbursements	as incurred

Table 4: Rental rates - Third-party equipment

Equipment	Rate
Rented equipment	invoice as submitted, plus handling fee
Damaged equipment	invoice as submitted, plus handling fee

Other:

- Security may be hired as appropriate and will be billed subject to a 15% handling fee.
- All equipment rates exclude operator costs and fuel, unless otherwise stated.

SKIMMERS

Table 5: Rental rates – Skimmers, self-propelled, durable

Description	Accessories	Hourly	
		Non-Member	Member
Burrard Cleaner No. 2 50' (Marco) vessel	belt skimming system (light to heavy oils)	\$365	\$295
Burrard Cleaner No. 3 28' (Marco) vessel	belt skimming system (light to heavy oils)	\$105	\$85
Eagle Bay/MJ Green 47' (Rozema) vessels	LAMOR brush or disc skimming system (light to heavy oils)	\$380	\$305
